The total amount of all grants under this Section 21(E) shall not to exceed one hundred and eighty thousand dollars (\$180,000) over the term of this franchise. Cablevision shall not be obligated to make any additional payments beyond year fifteen of this franchise. The Annual Grant shall be payable to the Township within sixty (60) days from receipt of the Township’s written request. Notwithstanding the foregoing, should Cablevision apply for a system-wide certification or otherwise convert its municipal consent to a system-wide certification in accordance with applicable law, it shall be relieved of any payments due and owing after the date of such conversion or award of a system-wide franchise.

  - b. The addition to an existing primary use building that is fifteen (15%) percent or more of the gross floor area of the existing building.

  - e. The major internal renovation or alteration of a building which constitutes fifty (50%) percent or more of the gross floor area.
- (1999 Code § 17.49.130)

### **37-25.14 Facade Design Standards.**

Since all of the existing buildings within the limits of the AAR Zone vary considerably in age and architecture in their present state, it is understandable that it is difficult to impose on them a rigid architectural design standard. Although beauty and character are subjective, there shall be an underlying design theme to the buildings and specifically to the facades so that a sense of conformity to a time period is achieved. Variation, creativity, uniqueness and distinction are not discouraged provided that there is a visual flow from building to building with no evidence of abrupt change or disruption in design or theme. Each building, although having its own identity should complement the others in style and taste without the look of an exact copy.

The architectural motif that is to be followed throughout the AAR Zone shall be based on the design of the "Old Clara Barton School Building" which is located on the southerly side of Amboy Avenue between Fourth Street and Brower Avenue. The architectural design can be characterized as "turn of the century". Understandably, exact historic replication is not expected, however this building is considered the focal point of the AAR Zone and all future building façade designs shall have its architectural flavor and sense. (1999 Code § 17.49.140)

### **37-25.15 Characteristics of Special Building Design Standards.**

Although diversity is not prohibited in the building design characteristics, various specific design criteria are to be followed as listed below:

- a. The prominent veneers to be used for facades and sides of buildings facing the street shall be brick or stone. The brick colors shall be in the brown, beige or red tones. Stone coloring shall be more flexible but maintain a subdued color scheme in keeping with the brick tones.
- b. Other veneers such as vinyl, aluminum or other manmade siding products and wood veneer products shall be considered secondary veneers to compliment the brick or stone. The colors of such veneers shall be in subdued tones to blend in a compatible and aesthetic fashion. The use of fluorescent colors is prohibited as are abrupt color changes, even in the subdued tones, that clash visually.
- c. All facades or sides of buildings facing the street shall have a décor that prohibits for a maximum distance of fifteen (15) feet horizontally, bare unadorned walls along each floor. These walls shall have appurtenances either decorative or functional to satisfy the condition. Such appurtenances shall consist of windows, doors, columns, lintels, cornices, balconies, overhangs, awnings, arches, railings or any other architectural items that fit the herein recommended design theme.

d. Roofs shall be of the "A" frame peak type wherever possible and include turrets, cupolas, towers and gables to reflect the "turn of the century" and "Victorian" attributes. Where it is necessary to install other than a peaked roof due to structural or height restrictions, parapets, cornices, eaves, turrets and other architectural devices that also reflect the above stated attributes shall be utilized.

(1999 Code § 17.49.150)

**37-25.16 Sign Standards.**

When a building is subject to the requirements of subsection 37-25.14, new signs for the building shall be installed in accordance to specific standards as herein set forth. To maintain the desired degree of conformity with an acceptable level of diversity, all signs shall be installed in accordance with a style that fits the architectural standards recommended for the AAR Zone.

Other than the above standards all other sign regulations shall be pursuant to Section 37-62. (1999 Code § 17.49.160)

**37-25.17 Site Standards.**

If a building subject to the requirements of subsection 37-25.14, is also installing site appurtenances, they shall be compatible with the streetscape design as installed by the municipality along Amboy Avenue in the AAR Zone. The proposed appurtenances which include but are not limited to landscaping, curbing, sidewalks, tree grates, benches, area lamps, trash receptacles, and planters shall comply with the streetscape specifications of said zone which are available at the Office of the Township Engineer. (1999 Code § 17.49.170)

**37-26 - 37-29 RESERVED.**

**SECTION II. If any section, paragraph, subdivision, clause or provision of this ordinance shall be adjudged invalid, such adjudication shall apply only to the section, paragraph, subdivision, clause or provision so adjudged and the remainder of the Ordinance shall be deemed valid and effective.**

**SECTION III. All ordinances or parts of ordinances inconsistent with or in conflict with the ordinance are hereby repealed to the extent of such inconsistency.**
