

# *Holiday Pet Safety Tips*

**H**olly, Jolly and Oh-So-Safe! Of course you want to include your furry companions in the festivities, Pet Parents, but as you celebrate this holiday season, try to keep your pet's eating and exercise habits as close to their normal routine as possible. And be sure to steer them clear of the following unhealthy treats, toxic plants and dangerous decorations:

## **O Christmas Tree**

Securely anchor your Christmas tree so it doesn't tip and fall, causing possible injury to your pet. This will also prevent the tree water—which may contain fertilizers that can cause stomach upset—from spilling. Stagnant tree water is a breeding ground for bacteria and your pet could end up with nausea or diarrhea should he imbibe.

## **Tinsel-less Town**

Kitties love this sparkly, light-catching "toy" that's easy to bat around and carry in their mouths. But a nibble can lead to a swallow, which can lead to an obstructed digestive tract, severe vomiting, dehydration and possible surgery. It's best to brighten your boughs with something other than tinsel.

## **No Feasting for the Furies**

By now you know not to feed your pets chocolate and anything sweetened with xylitol, but do you know the lengths to which an enterprising fur kid will go to chomp on something yummy? Make sure to keep your pets away from the table and unattended plates of food, and be sure to secure the lids on garbage cans.

## **Toy Joy**

Looking to stuff your pet's stockings? Choose gifts that are safe.

- Dogs have been known to tear their toys apart and swallow the pieces, which can then become lodged in the esophagus, stomach or intestines. Stick with chew toys that are basically indestructible, those that can be safely stuffed with healthy foods or chew treats are designed to be safely digestible.
- Long, stringy things are a feline's dream, but the most risky toys for cats involve ribbon, yarn and loose little parts that can get stuck in the intestines, often necessitating surgery. Surprise kitty with a new ball that's too big to swallow, a stuffed catnip toy or the interactive cat dancer with tons of play sessions together.

## **Leave the Leftovers**

Fatty, spicy and no-no human foods, including bones, should not be fed to your furry friends. Pets can join the festivities in other fun ways that won't lead to costly medical bills.

## **That Holiday Glow**

Don't leave lighted candles unattended. Pets may burn themselves or cause a fire if they knock candles over. Be sure to use appropriate candle holders, placed on a stable surface. And if you leave the room, put the candle out!

## **Wired Up**

Keep wires, batteries and glass or plastic ornaments out of paws' reach. A wire can deliver a potentially lethal electrical shock and a punctured battery can cause burns to the mouth and esophagus, while shards of breakable ornaments can damage your pet's mouth.

## **House Rules**

If your animal-loving guests would like to give your pets a little extra attention and exercise while you're busy tending to the party, ask them to feel free to start a nice play or petting session.

## **Put the Meds Away**

Make sure all of your medications are locked behind secure doors, and be sure to tell your guests to keep their meds zipped up and packed away, too.

## **Careful with Cocktails**

If your celebration includes adult holiday beverages, be sure to place your unattended alcoholic drinks where pets cannot get to them. If ingested, your pet could become weak, ill and may even go into a coma, possibly resulting in death from respiratory failure.

## **A Room of Their Own**

Give your pet his own quiet space to retreat to—complete with fresh water and a place to snuggle. Shy pups and cats might want to hide out under a piece of furniture, in their carrying case or in a separate room away from the hubbub.

## **New Year's Noise**

As you count down to the new year, please keep in mind that strings of thrown confetti can get lodged in a cat's intestines, if ingested, perhaps necessitating surgery. Noisy poppers can terrify pets and cause possible damage to sensitive ears.
